**ABSTRACT** : Daily cost of various ophthalmic solutions used in Japan for treating allergic conjunctivitis, including nine anti-allergic drugs and six anti-inflammatory drugs, was investigated. The daily cost of the anti-allergic drugs studied varied considerably, from $0.26 to $0.57; for the anti-inflammatory drugs the range was from $0.12 to $0.20. These data may be helpful in selecting ophthalmic products for treating allergic conjunctivitis.
