ABSTRACT : Daily cost of various ophthalmic solutions used in Japan for treating allergic conjunctivitis, including nine anti-allergic drugs and six anti-inflammatory drugs, was investigated. The daily cost of the anti-allergic drugs studied varied considerably, from \$0.26 to \$0.57; for the anti-inflammatory drugs the range was from \$0.12 to \$0.20. These data may be helpful in selecting ophthalmic products for treating allergic conjunctivitis.

抄録 アレルギー性結膜炎治療用点眼剤15種類の1日分の点眼コストを調査した。抗アレルギー薬では\$0.26から\$0.57、抗炎症薬では\$0.12から\$0.20までの相違が認められた。これらの結果は、アレルギー性結膜炎治療における点眼剤の選択に有用になると考えられる。
